PROFESSIONAL SUMMARY

AI & Software Engineer focused on cloud-native AI systems and scalable architectures. Continuously learning, staying up-to-date with new technologies, and leveraging feedback to deliver high-quality, production-ready solutions.

EDUCATION

Ecole 42 Paris

IT Solutions Architect – 2021 – 2025

- Intensive project-based program emphasizing peer-to-peer learning, low-level programming (C/C++), algorithms, and DevOps fundamentals in a self-driven environment.

BAC STI2D Montbéliard

Baccalauréat – 2018

Information and Digital Systems (SIN)

- Focus on digital systems: data acquisition, processing, and communication (electronics & software), with hands-on projects in system design and optimization.

LANGUAGE

🇫🇷 *Français*

🇬🇧 *English*

WORK EXPERIENCE

AI/Cloud Engineering Intern

OVHcloud

Sept 2025 – March 2026

- Designed, built, and maintain an internal Hugging Face-like platform (Data/Tool/Model Hub), actively used by internal teams to develop and deploy AI solutions.
- Deployed cloud-native apps with Kubernetes, Helm, Docker and CI/CD.
- Developed reliable data-scraping pipelines and automation workflows.
- Improved monitoring, documentation, and service resilience at scale.
- Designed and implemented RAG pipelines using vector databases (FAISS, OpenSearch)
- Developed AI agents and agentic workflows for internal automation and LLM-powered services

Freelance Developer

Self-Employed

2023 – 2025

- Provided hourly tutoring in C programming and general computer science for beginner clients.
- Built tailored websites for corporate clients (e.g., baticowin.fr), helping enhance their digital presence and attract new customers.
- Hackathons – built blockchain/Web3 prototypes under tight deadlines.

SKILLS

AI & LLM: RAG, AI agents, LangChain, n8n

Cloud & DevOps: Kubernetes, Helm, Docker, CI/CD

Programming: Python, C/C++, JavaScript, vibecoding (Codex, Claude code, with a privacy policy)

Data: Pipelines, scraping, vector DB (FAISS, OpenSearch)
